SUMMARY

Driven Full-Stack Developer transitioning from a seven-year career in network engineering, skilled in using JavaScript, HTML, CSS, React.js, Next.js, Express.js, and MongoDB to create end-to-end web solutions. With strong problem-solving and communication skills honed in high-stakes environments, I am committed to leveraging my passion for technology to enhance user experiences.

SKILLS

Languages & Frameworks:	JavaScript, HTML, CSS, SASS, TypeScript, C#, React JS, Next JS, Tailwind, Express JS, MongoDB
Tools & Platforms:	Git, GitHub, WordPress, Figma, Adobe Illustrator
Spoken Languages:	Fully bilingual in English & French
Soft Skills:	Communication, Problem-Solving, Adaptability, Collaboration

SELECTED PROJECTS

Scrap-Skip Web Application:

URL: **https://scrapskip.vercel.app/**

- Developed a marketplace web application using Next.js, enabling users to buy and sell unwanted household items.
- Implemented secure user authentication with Google OAuth and performed CRUD operations, managing data with MongoDB.
- Enhanced user interface with Tailwind CSS and managed server-side logic using Express.js, ensuring a seamless user experience.

ClimaSphere Weather App:

URL: **https://climasphere.vercel.app/**

- Developed an intuitive weather application using React.js, offering real-time weather conditions searchable by location, powered by the OpenWeather API.
- Designed with Tailwind CSS and CSS modules, enhancing the app's usability and visual appeal for user experience.

Bloom&Glow E-commerce App:

URL: **https://rocien.github.io/bloom-and-glow/** (In-Progress)

- Developed a modern, responsive e-commerce website for one of my clients, using React.js and Tailwind CSS to provide a visually appealing frontend for showcasing products and enhancing user engagement.

Professional Experience

Distributel	Network Support Engineer	Fall 2021 - Currently

- Resolving 30+ network and email issues weekly, ensuring customer satisfaction through effective troubleshooting and communication.

Frogfoot Networks	Network Engineer	Dec 2017 – Apr 2021

- Streamlined network solutions for 500+ clients, efficiently troubleshooting and resolving regional network outages.

Telasera	IT System and Web Hosting Engineer	Feb 2016 – Dec 2017

- Administered 50+ Virtual Private Servers, aligning with technical management of web apps and achieving 99.9% uptime.

EDUCATION

Ontario Diploma	Algonquin College Ottawa	Graduation: **Spring 2025**

- Mobile Application Design & Development

Professional Certificate	Coursera	Completed: **Summer 2023**

- Meta Frontend Web Development

Bachelor of Technology	Cape Peninsula University of Technology	Graduated: **Winter 2016**

- Networking & CCNA/CCNP
